

YOUR SAFEST WAY TO THE TOP

GALMON SERVICES

Our years of experience coupled with our focus on specialisation have equipped us with the capacity to meet and exceed our customers' expectations. Highly skilled in engineering design, installation, maintenance and trouble-shooting, our technical team is trained and well equipped to handle challenges on sites. We are confident of matching your most unique applications with our wide range of equipment. So when it comes to lifts, look no further.

Operating locally and regionally, we provide:

- Extensive variety of aerial work platforms and OEM parts
- Sales, rental and leasing of new, used, refurbished equipment
- Site surveys, demonstrations and quotations at no obligation
- 24-hour service support team
- Customisation of machines according to special requirements
- Operation, safety and maintenance training courses
- Post-warranty servicing for new and used machines
- Equipment upgrade, refurbishment and certification services

SITE SURVEY

Your work site may be unique with sloping grounds, steps, over-hanging structures or uneven terrains. We will be glad to conduct a non-obligation pre-rentals and sales survey at your site and recommend the appropriate equipment to be used. With proper site survey consultancy service, you will receive precise evaluation of your needs and requirements before you commit to any rental or investment in new equipment

WIDEST RANGE OF OEM PARTS

When your machine needs parts, we are the best source to ensure that the parts are factory-approved. We have a well stocked inventory to keep your machine running.

Equipment Maintenance, Servicing & Refurbishment

We provide warranty maintenance service & after sales contract maintenance services. Our rental fleet is maintained at regular intervals and under stringent requirements as defined in our ISO certifications.

Operation, safety & Maintenance Training

Operators are required to under go training before being allowed to operate an equipment. Training can be arranged & are conducted at our in-house facility or at customers' site. Successful candidates will be certified according to the training underwent.
